

# In times of passive voice

for amplified cello

James Diaz

[2019]

to Jairo Moreno

## Audience

The speakers should be located behind the player and facing diagonally.  
The level of amplification should compensate for the reduction made by the practice mute.  
Reverberation should be added according to the acoustics of the space.  
The perfect setup of the speakers and the player should create the illusion of a sound coming from the same source/location.
